Tel.No. (044) 940-5166 / 0942 089 6321

History

Located in the only Science City in the Philippines, Brilliant Kids Montessori aspires to bring to light the importance of the arts in every child's passion, dream, and life. As an artist, educator, and a mother, Ria Sajor, the founder of the school, ensures to build a learning environment that caters to both academic and artistic needs of a child. Officially, the school has its roots traced back to June 2008 when it was launched and recognized as the only art-oriented preschool and grade school in the Science City of Munoz, Nueva Ecija.

Since then, the school's administration never stopped from discovering and nurturing children with extraordinary talent, skill, and intellect. The school has evidently lived up to its promise as it introduces the first prima ballerina of the Science City of Munoz, Iriah Gene Sajor. Throughout the years of its existence, it has developed its learners' full potential by navigating its program to the physical, social, emotional, and cognitive development of each child.

With the school's numerous efforts to bring forth internationally-acclaimed artists to hold workshops and provide trainings, to expose children in performances that serve as a leisure event and an opportunity to develop critical thinking skills, to become an institution which is concerned with the well-being and mental health of its community, the school, together with the dedication and perseverance of its educators, has created a place for children to dream and become the professionals and artists they aspire to be.

The school has assured to take on unique approaches to be able to produce ultimately competent adults, not only in their chosen career fields but most importantly, in life. By making the children knowledgeable about the arts, the institution sets its heart on instilling in every child the power of believing in one's self to be able to create, become intellectuals, and citizens who care for their own country and countrymen.

With its continued pursuance of excellency and becoming a school that inspires and delivers actions to its community, the school has produced adults who have been given chances to conquer different career fields and performance stages both locally and internationally. The school's administration, no matter what type of crisis, problems, or circumstances that may come in the way, has a stance and belief that every child has the right to education, to receive what is known as the best learning environment, and to have a place and a platform for the children to create a strong foundation for themselves to be equipped in this fast changing world.

Vision

Brilliant Kids Montessori School vision is to be one of the most respected and successful private schools in the Philippines for having a balanced curriculum that is leaning both to academic courses and the arts. We endeavor to nurture the heart and the mind, and to challenge the intellect and skill of each pupil through meaningful education and experiences.

Mission

To inspire a passion of excellence.

To nurture the curiosity, creativity and imagination of the pupils.

To awaken the human spirit of each child.

To develop the hidden talents of each pupil.
