DIVISION MEMORANDUM

No. 354, s. 2022

“IWAS DENGUE: 4 O CLOCK HABIT CLEAN UP DRIVE”

To: Public Elementary and Secondary Schools
Teaching and Non-Teaching Personnel
All Others Concerned

1. The Schools Division Office strongly supports the Department of Health 4-S Strategy against the deadly Dengue Virus, now a year-round disease that is transmitted through a bite of Dengue- infected *Aedes aegypti* and *Aedes albopictus* mosquitoes, that usually thrive and lay eggs in any space or container that hold clear and stagnant water like bottle cap, dish dryer, plant axil, gutter, trash can or old rubber tire. This insect vectors usually bite between 2 hours after sunrise and 2 hours before sunset and can be found inside and outside the house. In connection with this, everyone is called for to be prime movers in the prevention and spread of this deadly vector borne disease.
2. With the increasing incidence of Dengue Cases during the wet season, all Public Elementary and Secondary Schools are hereby enjoined to conduct clean up drive in the school surrounding, roof gutters and drainages in order to prevent the mosquito infestation in DepEd Offices and schools every 4-o clock in the afternoon.
3. The enhanced 4-S implementation calls for everyone to be a part in controlling mosquito population and therefore prevent possible dengue death in the country. The **4-S campaign** stands for **Search and destroy mosquito breeding grounds, secure Self -protection measures, seek early consultation** and **Support fogging only in hotspot areas** where increase in cases is registered for two consecutive weeks to prevent an impending outbreak.
